

Superfy Platform
Ingest and manage all your materials asset data through the Superfy Platform

Superfy App
Scan and log your materials info

Superfy Collections®

Monitor, Schedule and Track your Collection Operations

Superfy Collections® provides complete end-to-end management of resource collections, from container to truck to depot.

The system analyses and interprets all the data from your smart and QR enabled Containers in order to predict the most efficient method of collection.

Key Benefits

- Improve your operational efficiency by over 100%, increase your recycling capability and limit your environmental impact in fuel and resources by over 50%.
- Digitise waste and recycling management data and reporting
- Automate intelligence from analysis and interpretation of vast amounts of data trends
- Real-time container fullness and temperature monitoring
- Optimize collection routes with real-time route monitoring

How it Works

SUPERFY PLATFORM

- Collections** End-to-end management of resource collections
- Materials** Track any recycling or manufacturing process end-to-end
- Assets** Dynamically track and manage assets
- Fleet** Real-time fleet operations management

SUPERFY APP

- Asset management** Assets location, 'live' asset and condition status
- Routing & Directions** Planned routes, detailed guidance
- Container Collections** Real-time asset tracking and location
