

S300 Smart Container System for Batteries & Vapes

COLLECTIONS

Safe solutions for battery and vape collection, transport and storage

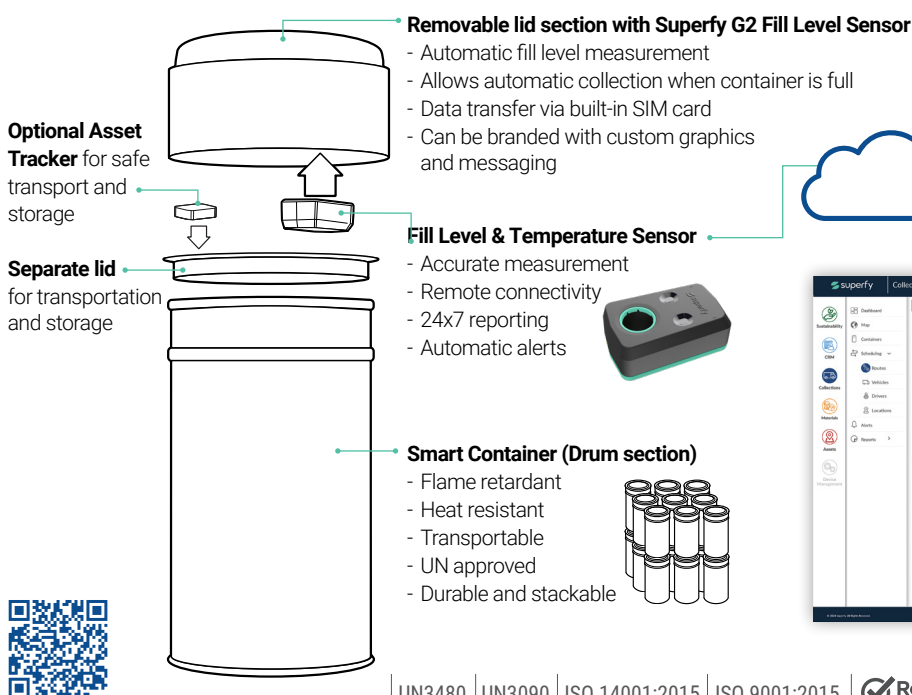

The **Superfy Smart Battery and Vape Container** is a 62 litre drum for battery and vape collection, transport and storage. Each smart container is fitted with a **G2 Fill Level Sensor** with access to the **Superfy Platform and App**.

The dual optical sensor provides accurate fill level and temperature sensing capability. The cloud-based platform and app uses the sensor information to provide real-time reports and analytics, optimize collection routes and dynamically track your assets.

Use this solution to improve the safety and operational efficiency of your monitoring, collection and transport of battery and vape waste and recycling materials.

Key Benefits

- Operational efficiency with accurate fill-level measurement
- 24 x 7 x 365 safety temperature monitoring and alerts
- Reduce collection trips by 40%
- Real-time data insights on collections
- Reduce scheduling and administration time by 30%

Superfy Platform and App

- dynamically track your assets
- optimize collection routes
- get real-time analytics
