

# Superfy Smart Vapes Container

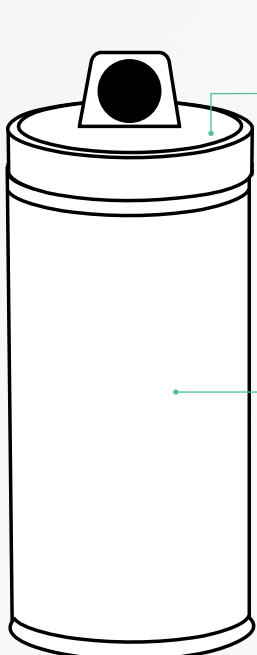

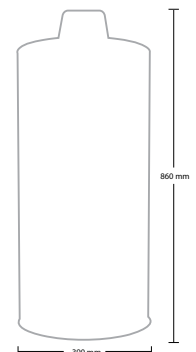

## Safe solutions for vapes collection, transport and storage

The **Superfy Smart Vapes Container** is a 62 litre drum for vapes collection, transport and storage.

Each smart bin is fitted with a **Fill Level Sensor** and access to the **Superfy Platform and App**. The dual optical sensor implementation provides accurate distance and fill level sensing capability. The cloud based platform and mobile app uses this information to enhance the monitoring, collection and transport of waste and recycling materials.

### Key Benefits

- Operational efficiency with accurate fill-level measurement
- Enhanced safety temperature monitoring
- Optimized route collection app
- Real-time data insights on collections

#### Fill Level Sensor

- Accurate measurement
- Remote connectivity
- 24x7 reporting

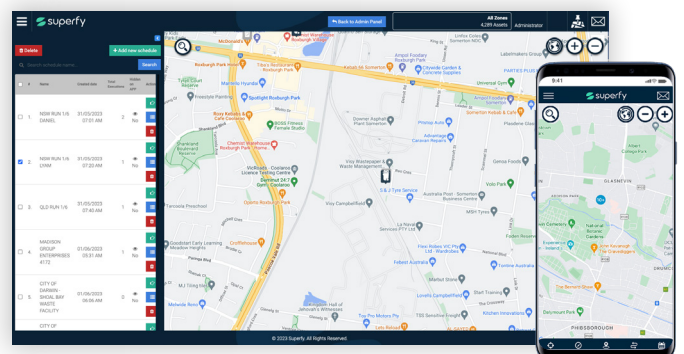

#### Smart Container

- Automatic fill level measurement
- Allows automatic collection when container is full
- Data transfer via built-in SIM card

#### Superfy Platform and App

- dynamically track your assets
- optimize collection routes
- get real-time analytics
